PROFILE

Experienced Software Developer with over two years of intensive experience in front-end and back-end development, primarily focusing on Node.js, Next.js, and React.js technologies using MERN stack.

PROFESSIONAL EXPERIENCE

Software Developer

Rebels tech FZCO

10/2022 – present

Dubai, UAE

- Designed and implemented jadwelny.com, integrating Stripe and Ziina for payments and a third-party hotels API, streamlining transactions and user interaction.
- Built a social media tool for easy picture and video uploads to S3 Bucket. Added photo compression and thumbnail creation, making images load 80% faster.
- Developed a RESTful API using Node.js, Sequelize, and Express.js, effectively serving both web and mobile applications with efficient data handling and scalable back-end functionality.
- Selected PostgreSQL as our RDBMS for its advanced transaction management and search capabilities, meeting our web and mobile app's complex data needs.

Software Developer

Code for computer software

06/2021 – 04/2022

Khartoum, Sudan

- Managed and built scalable and robust parts for a business process management system, guaranteeing reliable and effective functioning.
- Monitored MySQL Database to ensure maximum performance, achieving a 20% increase in efficiency.
- Headed the management and support of a billing system for a telecom company, ensuring efficient and reliable operations.

EDUCATION

Bsc honors in Information Technology

Future university

10/2016 – 02/2021

Khartoum, Sudan
